1 Introduction

The CLIQR™-5 (URSU-6700L & URSU-6720L) are designed to operate the Scientific Atlanta, Pioneer, Pace Micro, Samsung and Motorola digital set tops, plus the majority of TV, VCR, DVD and AUDIO equipment on the market as shown below.

CABLE Cable Converters TV Television VCR VCRs and TV VCRs DVD DVD Players Audio Receivers and DVD, etc.

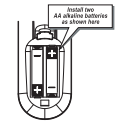

2 Replacing Batteries

Before you program or operate the remote control, you must install two new AA alkaline batteries.

STEP 1 Remove the battery compartment cover on the back of your remote control.

STEP 2 Check battery polarity carefully, and install the batteries as shown in the illustration below.

STEP 3 Replace the battery compartment cover.

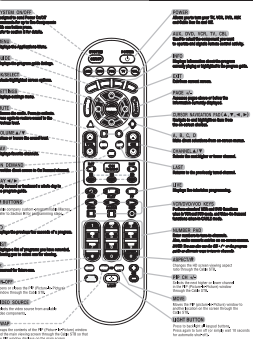

3 Operations

IMPORTANT STATE: Component/Device/CABLE Set Top Box (STB) Channel Default/CABLE channel numbers through the CABLE STB. You have the option of controlling your CABLE channel and numbers through the TV or VCR. Refer to section F for programming.

Volume Default: Volume and Mute control are automatically transferred to the respective Component mode you select as follows: CBL Cable Set Top Box (TV, VCR, AUX, AUDIO, Volume and Mute control for VCR and DVD are automatically transferred to the TV. However, you have the option of controlling CABLE Volume and Mute through the TV, VCR or AUX. Refer to section G for programming steps.

4 Button Functions

5 Programming the Remote Control

There are two ways you can program your CLIQR™-5 remote:

- The Pre-Programmed 5-Digit Code Method**
- The Auto-Search Method**

The Pre-Programmed Code Method allows you to setup all the buttons at once by entering 3-digit code numbers that correspond to a particular Component's manufacturer/brand, so it's the fastest and easiest of the two methods. Code Tables are in the backside of this instruction sheet! The Auto-Search Method scans through all the codes in the remote control, one at a time.

IMPORTANT SETUP NOTE: This pertains to all programming steps. When you are in setup mode, a component LED will light for 30 seconds if you do not press a button within 30 seconds, the LED light will turn off and exit setup mode and you will need to start over.

A. Pre-Programmed 3-Digit Code Method

STEP 1 Turn on the Component you want to program (TV, VCR, DVD or AUX).

B. Auto-Search Method

Turn on the Component you want to program (TV, VCR, DVD or AUX).

STEP 1 Press the (COMPONENT) button (TV, VCR, DVD or AUX) to be programmed and (OK/SEL) button simultaneously for 2 seconds. The Component LED light will turn on for 30 seconds indicating the walk to ready to be programmed.

STEP 2 Point the remote control toward the Component and enter the 3-digit code number assigned to your brand.

Note: If the 3-digit code number you just entered is correct, the Component will turn OFF. If it did not turn OFF, continue entering code numbers listed for that brand and/or Component type (TV).

STEP 3 After you've entered the correct code number and the Component has turned OFF, press the (POWER) button to turn the Component back ON. There is a time to test the VOLUME and MUTE buttons for the TV (or PLAY and STOP buttons for VCR and DVD) to make sure they all work. If any of the functions do not work as they should, repeat from STEP 1 using the next 3-digit code number listed for that brand and you find the best Component code.

STEP 4 Once you have found the correct 3-digit code, save it by pressing the same (COMPONENT) button one more time. The Component LED light will blink twice to confirm that the code was successfully stored.

Note: If the Pre-Programmed Method did not work, or if the Code Tables do not work, your Component may use the Auto-Search Method (see section D).

Note: If you have programmed the number 000, Example: One blink (power), eight blinks (power) and three blinks (volume) indicate code number 183.

D. AUX Function Programming a 5-Digit Function

You can take advantage of the AUX function to program a 5-Digit Component such as a second TV, VCR, DVD or Audio Component.

STEP 1 Turn on the 5-Digit Component you want to program (TV, VCR, DVD or Audio).

STEP 2 Press the (AUX) button and the (OK/SEL) button simultaneously for 3 seconds. The Component LED light will turn on for 30 seconds indicating the walk to ready to be programmed.

STEP 3 Point the remote toward the Component and press the (CH+) or (CH-) button one step at a time or keep it pressed. The remote will emit a series of (DUP/ST) commands. Release the (CH+) or (CH-) button as soon as the Component turns OFF.

E. Programming the System On/Off Button

This allows you to program the System On/Off button so it can send up to five power On/Off commands with one button press.

STEP 1 Press the (SYSTEM ON/OFF) button and the (OK/SEL) button simultaneously for 3 seconds. The (OK/SEL) button will turn on for 30 seconds.

STEP 2 Press the first (COMPONENT) button you want to store in the (SYSTEM ON/OFF) button and then the (POWER) button. Repeat this for other Components until you have stored all the desired power commands into the (SYSTEM ON/OFF) button.

STEP 3 Press the (CH+) button to save the power commands you stored. The (OK/SEL) button will blink twice to confirm the commands have been saved.

F. Programming Channel Control

You can program the channel controls (Channel Up, Channel Down, Last and Number) from one Component to operate on another Component mode. Default channel control settings on the remote control are as follows:

CBL CBL TV CBL VCR CBL
DVD DVD AUX AUX

If you wish to store the TV channel control in TV mode, use the following steps:

G. Programming Volume Control

Volume and Mute control are factory-programmed to automatically transfer to the respective Component mode you select, as follows:

CBL CBL TV TV TV VCR TV
DVD TV AUX AUX

However, you can program the volume controls (Volume Up, Volume Down and Mute) from one Component to operate on another Component. If you wish to store the TV volume control in CBL mode, use the following steps:

STEP 1 Press the (SYSTEM ON/OFF) button and the (OK/SEL) button simultaneously for 3 seconds. The (OK/SEL) Component LED light will blink 2 times in sequence to confirm the commands.

STEP 2 Press the (TV) button.

The Component LED will blink twice to confirm the programming.

To return to original state: If you wish to restore the CBL volume control in CBL mode, repeat the above steps but press (CBL) instead of (TV).

H. Programming a Macro button

Your remote model has custom-programmable Macro buttons available, they can be programmed to act as a Macro or Favorite Channel button in CABLE mode. This allows you to program up to 4-digit channels, two 3-digit channels or three 4-digit channels that can be accessed with one button press.

I. Programming a Macro button

Press the (TV) button and the (OK/SEL) button simultaneously for 3 seconds. The (TV) Component LED will turn on for 30 seconds.

STEP 1 Press the (VOL+) button.

STEP 2 Press the (TV) button again. The Component LED will blink twice to confirm the programming.

To return to original state: If you wish to restore the CABLE channel control in TV mode, repeat the above steps but press (CBL) instead of (TV).

J. Low Battery Warning

When the batteries are low and need to be replaced with fresh batteries, the Component LED lights will blink 2 times in sequence whenever (POWER) button is pressed to turn on equipment.

K. Record Your Component Set-up Codes

TV Set-up Code Number:
VCR Set-up Code Number:
AUX Set-up Code Number:
AUX Set-up Code Number:

6 Set-up Code Tables
